MEMBER POLICY #6

SUBJECT: WIRING AND WIRING INSPECTION

The application for membership includes a stipulation that the member's wiring must meet the minimum requirements of the latest edition of the National Electric Code (NEC) as well as compliance with the latest Bowie-Cass spec sheets. It is the member's responsibility that all wiring beyond the service entrance meets the NEC requirements. Bowie-Cass Electric Cooperative, Inc., will not certify compliance with the NEC beyond the main disconnect at service entrance. Before electric service can be connected, the Cooperative will inspect the service entrance and service equipment to determine if the minimum requirements of the NEC have been met. Service will not be connected until these requirements have been met. An inspection fee of $15.00 will be charged.

Service is defined in the National Electric Code as the necessary equipment usually consisting of circuit breaker, or switch and fuses, and the accessories located near the point of entrance of supply to that building.
